PERSONAL PROFILE

Proactive and responsible. I am a Java and a Go developer, focused on distributed systems. In the IT world, I am known to possess strong technical knowledge and to deliver solid applications. Through my 7 years of experience in developing successful software, not only have I increased revenue for some Brazilian companies, but also crafted systems for foreign ones. I am also active in open source communities such as GitHub.

SPECIFIC KNOWLEDGE / SKILLS

- Microservices architecture
- Rest API construction
- Project management
- Kanban
- Docker
- Istio
- Open source software management
- Fast learner
- Team player
- Hard working
